Shape your display as desired

These are alternative ISOframe Wave layouts showing different shapes of a 6-section display wall. The world's first fully flexible display & exhibition system.

General Information

- Standard width for all single sided modules are 31.5" (except Graphic wings).
- Standard heights for all modules are 90" (Midi) and 98" (Maxi). Towers 110" and 118".
- All modules are for single sided graphics use if not otherwise indicated.
- All modules apart from the Wave Flexi-Link modules contain fixed horizontal beams.
- All modules include "Kickers & Hangers" as well as magnetic tape for the graphic panels.
- A "Starter module Ⓢ" has 2 vertical posts/feet, an "Extension module ⓔ" has 1 vertical post/foot.
- Each ISOframe wall should include 1 "Starter module" only and the desired number of "Extension modules".

Graphics Printing information

Information (material, sizes, etc.) for printing graphic panels can be found on the reverse side of the assembly instructions which are included with all deliveries. You can also download this info from www.MarkBricDisplay.net

Wave Flexi-Link Modules

Wave Flexi-Link

System Frame

This Fabric System Frame for self-build exhibition stands is our most portable yet, the fabric making it possible to pack away the graphics in the smallest of spaces. Ceiling sections, door modules, literature holders, media screens etc. are available to personalize your design and increase functionality.

Easy assembly

Each frame corner is joined with 4 FastClamps.

Each length is joined with 1 Fast Clamp.

The feet have twist-in connectors.

The twist lock connector makes vertical building quick.

The PVC edge strips make fabric panels easy to attach.

Standard System Frames

The kits include aluminium profile lengths, which are joined together with our unique FASTclamp connector to build the frame. The profile lengths in our standard frame kits are available in 10.63", 18.5" and 39.37" for maximum transportability. No screws or tools are needed to assemble the frame.

Vertical and horizontal support posts are included. One foot support, item IS-9058, for each base length is included. Add corner profiles, door and more stable feet if desired.

Frames can be used for single or double sided use.

Customized System Frames

Fabric frames can be produced in special sizes on order.

Vertical and horizontal support posts

Vertical and horizontal support posts must be used for frame lengths of **78.74" and over**.

Connection of Fabric Frames

When placing an order please indicate if the frames are going to be connected to each other in a 90° angle, for example in a trade show booth:

Item no + A = Frame is not connected
 Item no + B = Frame is connected on one side
 Item no + C = Frame is connected on both sides

Order separately the 90° Corner Posts - see next page!

ISOframe Fabric - Examples of complete Trade Show Stands

Here are some examples of self-build exhibition stands with the ISOframe Fabric system. Different floor areas and with one or two sides open. The screw connector, item IS-9613, has been used for connecting the frames and the stands are meant to be used with single-sided graphics. The header frame is connected with 90 corner posts, for double sided graphics.

Kits are for Fabric frames and connectors only. Accessories such as spotlights, media screens, literature holders, transport bags etc. are **not** included in the prices below – see "Accessories" above. Contact us if you need any help or more ideas on how to design your new Fabric stand.

Light Box Frame

The ISOframe Light Box is ideal for large free-standing single exhibits or for integration into an ISOframe exhibition stand. Light boxes can be equipped with graphics on both sides and have extra heavy feet for increased stability.

Our ISOframe Light Boxes can be delivered customized as ready-cut profiles, or in profile lengths of 122.05" for local cutting. Add screw corners and straight joints, as well as the LED-bars and transformers. Wall brackets, ceiling suspension mounts and feet are available as accessory options.

We normally deliver the customized profiles in appropriate manageable lengths with screw joining brackets for quick and easy assembly at the place of use. The light boxes are delivered flat packed.

Please note: The fabric print material needed for light boxes is different from the material used in regular Fabric frames.

PVC-strip for Fabric graphics

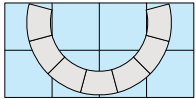

The ISOframe Fabric Frame is made for fabric graphics. A PVC-strip is stitched to the edges of the fabric and is then inserted into the slot of the Fabric Frame. The Fabric Frame takes strips of 9-10 mm width.

Item	Description	Size	Packing
IS-9067	PVC strip	0.35" x 0.11" x 656 ft.	1 roll

Please note: Sizes given for the fabric prints are recommendations only. All textiles behave differently depending on the material type, weave, orientation, stretch, shrinkage and other factors such as humidity, temperature and method of printing. Always ensure you test any new material and allow time for the test print to exhibit shrinkage or stretch while fitted to a frame. When printing your own fabric graphics, Mark Bric cannot be held responsible for problems arising from any fabric print.

ISOframe – Large Reception Counters

The Mark Bric ISOframe program includes a modular system of large reception counters, which can be individually designed to fit any reception area or trade show stand. Choose one of our complete counter units – straight or curved - with wooden top and inner shelves in gray finish, or customize your counter by combining different counter sections into a unique shape. All of our reception counters offer a stylish solution at a reasonable price, with no compromise on quality.

Shape your display as desired

These are alternative ISOframe Ripple layouts showing different shapes of a 9-section display wall. The Ripple wall can be flexed into almost any shape and gives you maximum flexibility to suit your needs. Add or remove panels one-by-one as desired.

General Information

- Standard width for each section/graphic is 31.5".
- A display wall consists of banner stands and flexible link graphics.
- Each display wall begins with a straight banner stand section then alternates with a flexible link graphic section (without a post) as it grows.
- Each display wall consists of an odd number of sections: 1,3,5,7,9 etc.
- Standard height is 82.7".
- All modules are for single sided use.
- All modules include "Kickers & Hangers" as well as magnetic tape for the graphic panels.

Printing information

All information (material, size, etc.) for printing the graphic panels can be found on the reverse side of the assembly instructions which are included with all deliveries.

You can also download this information from www.MarkBricDisplay.net

ShowFlex

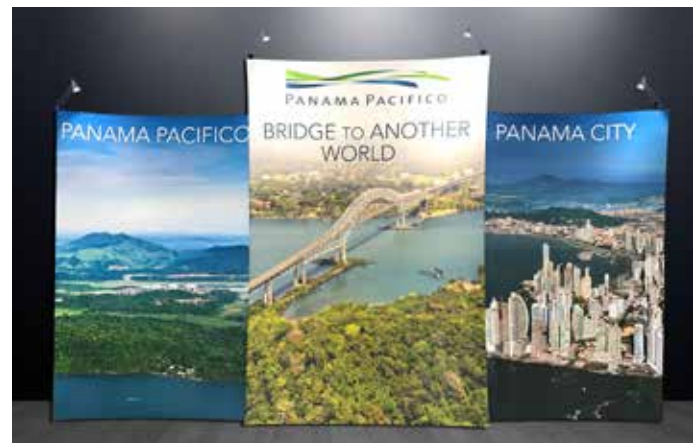

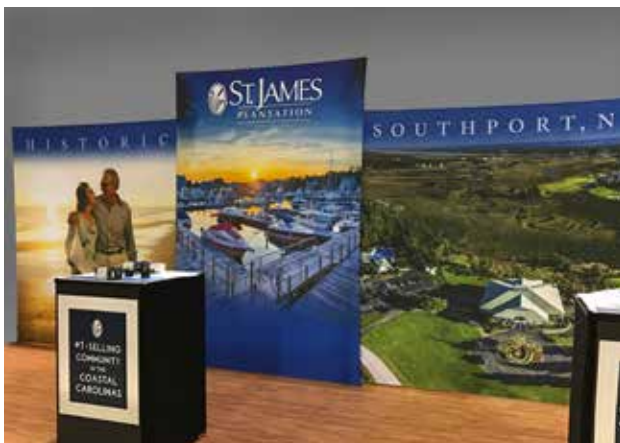

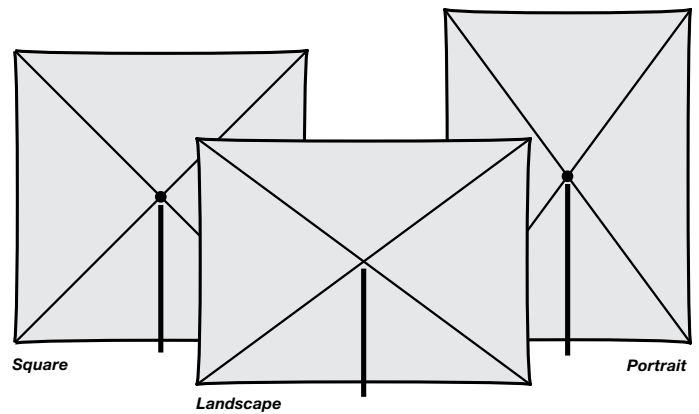

60 sq.ft. - 30 seconds - 10 lbs.

ShowFlex tension fabric displays feature a unique folding frame design and are as easy and quick to use as an umbrella. A hi-res printed fabric in a polyester stretch material is attached and stays on the system so you get a complete exhibit backwall up in less than 30 seconds. The unit weighs only around 10 lbs and you can choose between a hard case (flight case) and a soft carrying bag for transport.

ShowFlex comes in three different shapes: Square, portrait and landscape. Our most popular versions give you approximately 60 square feet of graphic space!

- Flexiframe 5 year warranty

Under the general terms of this warranty, Mark Bric will, at its sole discretion, repair or replace any product covered by the warranty and found faulty during the course of normal use. All system hardware is covered by this warranty against manufacturing defects in materials, quality or workmanship. The warranty does not extend to damage caused by negligence or abuse, nor does it protect against normal wear and tear, such as scratches, associated with routine use, as well as transport damages.

In the event of product failure or malfunctioning, please begin by contacting the Mark Bric dealer/distributor from which the system was purchased. In the event that the dealer cannot be located, please inform us by e-mail (markbric@markbric.com) about your problem.

The more-expo concept

The more expo business concept is to offer economy display products with the best possible quality. Recognizing the growing demand for low price alternatives, we have now established our own organization in mainland China where we are constantly scanning and evaluating the Asian market to find the most competitive and up-to-date display products manufactured today. The products chosen will then be further improved and modified to be in line with the more-expo requirements for function, design and quality.

During the production process of these products our quality auditors constantly visit the factories to make sure that these products meet or exceed our quality expectations. We also assure that environmental issues are considered and that the products are produced under acceptable working conditions as well. By purchasing these products in very large quantities, working directly with the factories (no middle-men) and a highly cost efficient distribution system, we can guarantee you the best possible price.

Tabletop Displays / ShowStyle Briefcase

ShowStyle, a popular “briefcase” display, transforms from a small briefcase to a tabletop display in just a minute! The self-storing design allows the display to close with the graphics attached so it is ready to use at any time.

The ShowStyle, when opened is approximately 48" (w) x 24" (h). The header panel stores in a special slot molded into the back of the case. The entire body of this display is a tough molded plastic with velcro receptive panels inside. Very lightweight and easy to carry, the ShowStyle is perfect for smaller presentations. The ShowSyle Pro32 is a new, larger version of this popular display. This display measures 64" (w) x 32" (h); that gives you 77% more display area and it still only weighs 20 pounds!
